

CREATE A SIMPLE LIFESTYLE

Quick Operation Guide

8.Ethernet(LAN) Settings

Setting

Ethernet:

To connect to the Internet via Ethernet:

1. Select Ethernet.
2. Plug in the Ethernet cable to the GT1 device.
3. The device will automatically detect it.

After you have finished setting up your device, you can change how you connect to the internet by clicking on Settings on the homepage and going to Network and do steps 1-3.

9. Bluetooth Settings

Setting

Bluetooth

To connect to a Bluetooth device:

1. From the homepage, click on Settings, then on Other, then on More settings, then Bluetooth, and turn Bluetooth ON.
2. Click "Not visible to other Bluetooth devices." The menu will turn to "Visible to all nearby Bluetooth devices," and a 2-minute countdown will begin.
3. Select the target device within 2 minutes and it will be connected automatically. Some devices require a pairing code (usually 0000 or 1234).

Setting

10.Set up WLAN hotspot Settings

Set up WLAN hotspot

To set up a WLAN hotspot with your GT 1:

1. From the homepage, click on Settings, then on Other, then on More settings, then Portable Hotspot, and select "Portable Wi-Fi Hotspot."
2. Select "Set up Wi-Fi hotspot" and create Network SSID, Security, and Password parameters.
3. To access GT1's hotspot on other devices, select the Network SSID you modified and enter the password.
